

USP Compounding Compendium

Improving access to safe, quality medicines for patients

Millions of medicines are compounded each year to meet the specific needs of each patient, who otherwise may not have access to their treatments in the right concentration or dosage. Healthcare practitioners must have timely information at hand to provide patients optimal, quality healthcare delivery.

Using the online *USP Compounding Compendium* can help ensure the quality of your compounding methods and preparations for those patients most in need of tailored medications and personalized patient care.

The Trusted Go-To Resource for Pharmacists and Healthcare Practitioners

The *USP Compounding Compendium* is the trusted go-to source for pharmacists and healthcare practitioners that provides access to:

- ▶ **USP <795>** and **USP <797>** and **40+** compounding related General Chapters
- ▶ **170+ compounding monographs** from the United States Pharmacopeia and the National Formulary (USP-NF)
- ▶ **Continuous online access** to the most **up-to-date** published version of the compounding compendium
- ▶ **Compendial notifications** to alert subscribers of newly released and/or updated content

Key New Features of the online Compounding Compendium:

- ▶ Can be **conveniently accessed** from any digital workspace
- ▶ Includes **enhanced search capabilities**
- ▶ Contains **customizable bookmarks and alerts**
